Relocating to Charlotte / Raleigh, NC — Available Immediately

June 15, 2026

Hiring Manager
Boston Scientific — Urology (eCoin)
Charlotte, NC

Dear Hiring Manager,

A \$5.47M territory managed through disciplined Salesforce planning, structured product demonstrations to professional buyers, and 145% monthly quota attainment in a declining market — this is the B2B field sales track record I am bringing to Boston Scientific's Territory Executive role in urology. I understand the eCoin is a sophisticated implantable device requiring clinical credibility, and I am pursuing this role with both eyes open: the sales infrastructure is in place; the clinical context is the investment I am committing to make.

At KraftMaid Cabinetry, I held sole field responsibility for 23 accounts and a \$5.47M annual portfolio. I delivered structured product education and live demonstrations across all 23 locations, built trusted advisory relationships with principal-level buyers who had high standards and many alternatives, and grew market share while the broader market contracted 8%. I managed the territory through Salesforce CRM and Power BI analytics, using data to prioritize account coverage and identify growth opportunities. At TTI, I managed a \$4.06M multi-brand territory and drove 5.15% YOY revenue growth through daily face-to-face field engagement and competitive product demonstrations.

The eCoin implant for overactive bladder is a procedure-enabling device — which means the sales motion is about educating urologists and urogynecologists on patient identification, procedure technique, and reimbursement pathway, then building the account infrastructure to drive consistent case volume. I recognize that the clinical selling environment at Boston Scientific is more demanding than anything I have encountered to date. I will be honest: I am applying because the product genuinely interests me, the company's reputation for device quality is unmatched, and I am willing to do the work to earn credibility in the urology call environment through product study, shadowing, and preparation.

I am relocating to Charlotte immediately with no start date constraints. The OTE at this level is significant, and I understand that the clinical complexity is the reason. I believe the investment is worth making. I would welcome the opportunity to discuss the Territory Executive role and what Boston Scientific needs from a rep in Charlotte right now.

Sincerely,
Collin Celic
