Relocating to Charlotte / Raleigh, NC — Available Immediately

June 15, 2026

Hiring Manager
Olympus
Charlotte, NC

Dear Hiring Manager,

Olympus's endotherapy territory in Charlotte requires a rep who can build relationships with gastroenterologists and GI lab staff, conduct in-services on complex endoscopic devices, and manage a clinical account base with the attention and professionalism that medical device selling demands. I am applying because the field sales competencies that role requires — consultative relationship building, structured product education to professional audiences, and disciplined territory management — are the same competencies I have been executing at a high level in B2B outside sales.

At KraftMaid Cabinetry, I delivered structured product demonstrations and education sessions across 23 professional buyer accounts, converting skeptical stakeholders into engaged brand advocates through preparation, credibility, and consistent follow-through. I managed a \$5.47M territory through Salesforce CRM and Power BI analytics, built account-specific business plans with principal-level buyers, and grew market share in a declining industry. I hit 145% of monthly quota in January 2026. At TTI, I demonstrated complex product features to professional buyer audiences daily — making the case for technical differentiation in a head-to-head competitive selling environment.

I am approaching the clinical dimension of this role with honesty and respect for the environment. Endotherapy involves a high level of technical product knowledge and procedural context that I do not yet have. What I bring is the field sales foundation that a good Olympus rep builds on: relationship discipline, territory planning skills, presentation confidence, and the accountability to perform under quota pressure. I am committed to learning the endoscopy product line and the GI lab environment with the same depth I applied to every product portfolio I have represented.

I am relocating to Charlotte immediately with no start date constraints. I would welcome the opportunity to discuss the Territory Manager role and what Olympus needs from the Charlotte endotherapy territory right now.

Sincerely,
Collin Celic
